

Krystal Sexton, Ph.D.

**Global Health Analytics Manager
Shell
Houston, Texas**

Krystal Sexton, Ph.D., is the Global Health Analytics Manager at Shell. She obtained an M.S. in Biostatistics and a Ph.D. in Epidemiology from the University of Texas School of Public Health and completed postdoctoral fellowships at both MD Anderson Cancer Center and Baylor College of Medicine. She was faculty at Baylor College of Medicine with a research focus on breast cancer disparities in diagnosis and survival of minority women. Krystal began her career at Shell as an epidemiologist and helped develop the holistic approach to health that covers physical, mental and social health. She wrote the scientific evidence base for the new approach to health that went to the CEO and C-suite leaders, and she led the well-being team for North and South Americas for several years. Krystal now leads a global team of epidemiologists and health analysts who support cross-discipline and cross-functional work across Shell with a primary focus on holistic health and its association with business and health outcomes.
